Equipment

Cocktail Shaker
You can’t get far with most cocktails without the staple of any personal home bar - the cocktail shaker. Add some ice to the ingredients within, shake for 10-15 seconds and strain into the required glass. Simple.

Strainer
Right after the cocktail shaker comes the strainer. Some shakers have a basic strainer built in, but to catch all those ice lumps or fruit pieces you don’t want in your finished product, a simple strainer suffices.

Jigger
To get the right balance of flavours you need the right proportions of the ingredients, and most of the time that’ll be in the form of measuring the liquid in a jigger. They usually come in 25ml and 50ml variations, so we’ve tried to keep our cocktails in this book within that range.

Techniques

Shaking
“Just make sure the top stays on” as my old bartending mentor used to say. And I part that knowledge onto you now. But along with that, you’ll want to break up the ice into smaller particles, chilling the contents and combining up the flavours. Shaking for around 10-15 seconds is usually sufficient, you’ll feel the outside of the shaker become really cold and frosted.

Stirring
I’m not sure we need to give you an introduction to what this means, but if you want to get all cocktail geeky, then stirring allows you to chill drinks, or combine flavours, without bubbling up or bruising the ingredients. It also allows you to mix fizzy elements such as champagne or soda. Twizzle away for 10-15 seconds and you should be good to go.

Muddling
Muddling is such a great descriptive word, literally muddling or mashing the flavours up. You don’t need a muddler, a good hard muddle with the end of a small rolling pin might suffice, but a muddler helps really release those flavours. Simply grind and twist whatever you’re muddling a few times to get the juices and oils released from the ingredients.
In this book we’ve used a consistent millimeter measurement throughout, or explanatory measurements where appropriate. You can easily swap ml for oz using the conversion below:

The drink has evolved quite a bit since the term “White Russian” was first coined in 1965, and there are a few unique ways to mix it. In each case, it’s possible to include slightly different ingredients without compromising the identity of the cocktail. As such, the flavour and strength of the beverage may vary slightly, depending on where the drink is being ordered from.

**METHOD**
In a lowball glass with ice add the vodka and coffee liqueur. Give the mixture a stir to combine the ingredients before adding the cream on top. Don’t stir the cocktail before serving, and it should create a slightly layered effect.

There are two stories about the origins of the classic drink. Francis Drake was happy to claim the cocktail as his own creation. When the explorer had conquered the Spanish city of Cartagena de Indias, he headed towards Cuba. However, many of his men began to fall ill with dysentery and scurvy. They believed that they would find medicines in Havana. Sir Francis Drake came back from the town with Aguardient de Cana (a crude form of rum), lime, sugarcane juice, and mint. When the ingredients were mixed together, the Mojito was born, although it was originally called the El Draque. It is unlikely that the mixture was very beneficial, although the lime juice may have helped to alleviate the symptoms a little.

The Japanese Slipper, one of the most elegant cocktail drinks ever created, doesn’t really have much to do with Japan or slippers. A subtle blend of Midori melon liqueur with Cointreau and lemon juice, the Slipper mixes sweet and tart flavors for a perfect before-dinner drink. Why is it called the Japanese Slipper? Possibly because Midori is the Japanese word for green.

**METHOD**
Shake all the ingredients together in a cocktail shaker until the outside of the shaker becomes slightly frosted. Strain into a cocktail glass. The Japanese Slipper is served with a maraschino cherry in the middle of the cocktail glass.

The daiquiri, a cocktail conjured from rum, lime juice and sugar, originated in Cuba where such ingredients are plentiful, and has been a popular libation in the United States and beyond for over a century. American mining engineer Jennings Cox first mixed the daiquiri cocktail in 1900 at a bar in Santiago, Cuba. White some may credit Cox with creating the daiquiri, British sailors were consuming the grog’s combination of rum, water, lime juice and sugar as a daily ration in the latter 1700s.
